

Application Reference

I'm currently employed as

Primary Location of Work

I understand that as part of my mortgage application, my working income is required to afford my monthly payments. I believe that it's reasonable for me to continue working in my current industry to age

I have considered the risks associated with working to this age such as ill health, and understand that if I'm unable to work while my mortgage contract is in place, I'm still required to make my monthly payments.

I have considered the impact on my ability to make my monthly interest payments if I'm unable to work and, if an alternative arrangement can't be found, I'm prepared to action my repayment vehicle early to redeem my mortgage.

To allow us to make an informed assessment of the plausibility of your planned retirement age, please provide detail on your job role, industry you work in, day to day responsibilities and working pattern.
